FAST ELECTRIC VEHICLE CHARGER INSTALLED AT HOLLYWOOD BURBANK AIRPORT

BURBANK, Calif., November 13, 2018 — The Burbank Water and Power Department (BWP) has completed the installation of an Efacec Efacepower Direct Current (DC) Fast Charger for Electric Vehicles (EV) at the Hollywood Burbank Airport. To access the DC Fast Charger, customers must pull a ticket for the short-term parking structure. The DC Fast Charger is located adjacent to the entrance to the short-term parking structure. (See photo on page 2 for location.)

This charging station, along with six Level 2 EV charging stations installed in 2016 at the Airport's Valet parking garage, is part of a Right of Entry Agreement that the Burbank-Glendale-Pasadena Airport Authority and the City of Burbank entered in 2015.

The City installed these EV charging stations at the Airport as part of its objective to promote the use of alternative fuel vehicles to support sustainability goals, reduce environmental pollution, and support the efficient use of natural resources.

The DC Fast Charger is compatible with most battery electric vehicles and offers unparalleled usability, safety, energy management and affordability. Tesla owners will need to supply a public charging station "adapter," which is available for purchase from the Tesla website.

The DC Fast Charger will provide a valuable service to the Airport's short-term, self-park customers with electric vehicles, charging a vehicle in 20 to 30 minutes. Customers will need to contact Greenlots at 855-900-7584 or <https://greenlots.com/ev-drivers/#help> and download its mobile app to use and pay for the service. BWP's current rate is 28 cents per kilowatt hour.

Posted parking rates apply.
